RE: Charitable Donation from Albert E. Hodsdon III

Dear Robin,

I am writing today to inform you that former Fairfield KSTD Trustee & Chairman Albert E. Hodsdon III presented KSTD with a significant charitable donation on February 22, 2022. The Board voted to accept the donation and distribution amounts for District Members affected by the 2019 force main failure at Main Pump Station in Waterville. Please see attached memorandum that explains Mr. Hodsdon's wishes for the donation disbursement.

We are extremely humbled by Mr. Hodsdon's generosity and dedication to not only Kennebec Sanitary Treatment District but also the Central Maine Community over the past fifty years. His expertise, wisdom and charisma will be deeply missed on our Board. It will be no easy feat to find replacement of his one-of-a-kind skillset.

Attached to this letter is a memorandum to the Board of Trustees explaining the donation and disbursement in detail, as well as a check to the Town of Benton in the amount of **\$2,755.20**. Please feel free to give me a call with any questions at 207-859-3070.

Sincerely,

Nick Champagne
Superintendent

MEMO

TO: KSTD Board of Trustees
FROM: Nick Champagne, Superintendent
RE: Acceptance of Charitable Donation
DATE: MARCH 4, 2022

KSTD received a significant and generous charitable donation from Fairfield Trustee Albert E. Hodsdon III in the amount of \$32,000.00 on February 22, 2022. Mr. Hodsdon stated that he wanted the money to be distributed to the District Member Communities affected by the 2019 force main failure and subsequent expenditures that resulted in the repair, replacement and miscellaneous fees associated with the incident. KSTD would act as a pass-through entity to distribute the funds.

I am recommending that the Board first take action to accept the charitable donation from Mr. Hodsdon in the amount of \$32,000.00. Further, I am recommending that the Board take separate action to accept the following distribution of the funds based on 2019 flow data at Main Pump Station in Waterville. Mr. Hodsdon's intentions were clear that the money would be dispersed to member communities affected, that being the Town of Fairfield, Town of Benton & the Waterville Sewerage District. While Huhtamaki, Inc. contributes a significant amount of flow to Main Pump Station, they are not a District Member. Upon acceptance, the District will distribute checks directly to member communities in the totals on the last column of Table 1. See below:

Table 1 – 2019 Main Pump Station Flows, Percentage of Flow & Distribution of Donation

Member Community	2019 Flow (Million Gallons)	% of Member Communities Contributing	Total
Town of Benton	26.288	8.61%	\$2,755.20
Town of Fairfield	190.938	62.54%	\$20,012.80
Waterville Sewerage District	88.082	28.85%	\$9,232.00
Totals	305.308	100%	\$32,000.00

TABLE 6
PUMP STATION PERCENT USE
PREVIOUS THREE YEAR FLOW QUANTITIES
 2020

MAIN PUMP STATION (Million Gallons)						
Member	Flow 2017	Flow 2018	Flow 2019	Three Year Average (MG)	% Use	2019 % (1 yr)
BENTON	27.656	25.821	→ 26.288	26.588	2.57%	2.57%
FAIRFIELD	179.653	173.885	→ 190.938	181.492	17.57%	18.66%
III	681.536	746.264	717.845	715.215	69.23%	70.16%
WATERVILL	141.974	99.275	→ 88.082	109.777	10.63%	8.61%
TOTAL	1,030.819	1,045.245	1,023.153	1,033.072	100.00%	100.00%

FAIRFIELD PUMP STATION (Million Gallons)						
Member	Flow 2017	Flow 2018	Flow 2019	Three Year Average (MG)	% Use	2019 % (1 yr)
BENTON	27.656	25.821	26.288	26.588	16.89%	16.34%
FAIRFIELD	131.494	126.437	134.628	130.853	83.11%	83.66%
TOTAL	159.150	152.258	160.916	157.441	100.00%	100.00%

This table determines the percent use of each Member at the two pump stations. The Main Pump Station serves the Towns of Benton, Fairfield, Waterville, and III. The Fairfield Pump Station serves the Towns of Fairfield and Benton. Benton Pump Station serves only the Town of Benton. The Town of Winslow operates its own station and pumps directly to facility. Savage St and II Meter Pit serve only the Town of Fairfield.

Note: The percentages shown within the above table are for display purposes only. The percentages have been rounded to two decimal places (0.00%) and are therefore an estimate of the true percentage value. Microsoft Excel executes calculations using the actual percentage value, not the estimates shown in the tables.
